

Intuitive, secure file management

Eyewitness Data Vault is a powerful digital video management solution that automatically and securely manages digital assets locally or across a network. It is configurable and scalable to fit virtually any environment.

Configurable

- Highly scalable - supports small & large installations - expand storage locally or via the cloud
- Flexible storage policy based on officer name, car number, file classification, etc. - Improves file management and resource efficiency
- Schedule Network file transfers as convenient to maintain Network speeds/performance and minimize operational cost

- Manage evidence from all Kustom digital in-car, motorcycle and body worn video in addition to non-proprietary sources

Convenient

- Intuitive, user friendly interface simplifies learning and enables efficient use
- Compatible with Active Directory and LDAP - easily integrates with established login credentials
- Fleet Management - remotely update in-car system software

- Synchronized multi-camera playback
- Playback timeline - easily cue video to any event (trigger, bookmark)

Secure

- Highly configurable rights management - determine who sees what
- Automatic file integrity checks (MD5) ensures authenticity
- Comprehensive audit reports track and validate chain of custody

Highly scalable

Easy to use

Secure user management

Eyewitness Data Vault

Digital Asset Management System

Additional Features

- GPS playback mapping - retrace vehicle's route
- Easy DVD/Blue-Ray burning (Include video file(s), media player, audit report, associated files)
- Powerful search features improve the efficiency and accuracy of searches
- Configurable system status email notification
- Dashboard application for convenient monitoring of system services/storage
- Single or networked download sites
- Web Interface - allows authorized officers to search and play files using a networked PC
