

**Document the facts behind your speed enforcement.**

**Back Office Support**

- Manage video and data from multiple devices (ProLaser<sup>®</sup> 4, LaserCam<sup>®</sup> 4 and PLVideo)
- Search and review evidence
- Print or export court evidence and administrative reports
- Manage device settings (LaserCam 4 & PLVideo only)

**Report Generation**

- Event details are part of permanent court record
- Important event data is logged including date and time, operator, modes of operation, posted speed limit, captured speed
- GPS coordinates and pertinent user and device details
- Tracking history is illustrated in a graphical format with speed, range & posted speed limit

**Key Features**

- Manage users and rights
- Manage device parameters such as units, time zone, location code, low power wireless settings
- Case management of video records
- Localization support (multiple languages with pull down menu)
- Track devices by GPS
- New languages easily added

**Analysis and Reporting**

- Video recording and laser usage analysis
- Speeding violation graphic analysis
- Analyze data such as usage reports, operator reports for police station, region, state or country
- Print or export to PDF, Word, Excel and XML

Pertinent data from the record is captured here including the date, time, operator, modes of operation, posted speed limit, peak speed captured, and GPS coordinates

Tracking history is documented in the recorded events section of the report

Photos of the infraction are captured and documented

Details of the information obtained and recorded

Tracking history is illustrated in a graphical format which includes speed and time/distance indicating precisely when speed reduction occurred

Illustrates GPS coordinates and pertinent documentation such as date and time, max speed and speed limit

ProLog court report

ProLog snapshot

- Easily search and review evidence**
- Graphic analysis supporting enforcement**
- Simply print and export reports**

### ProLog Lite

- Application and device configuration
- Data download from multiple devices
- Ability to search and edit records
- Create evidence reports
- Case management
- Track single device by GPS
- Print and save records
- For use on stand-alone PC

### ProLog Standard

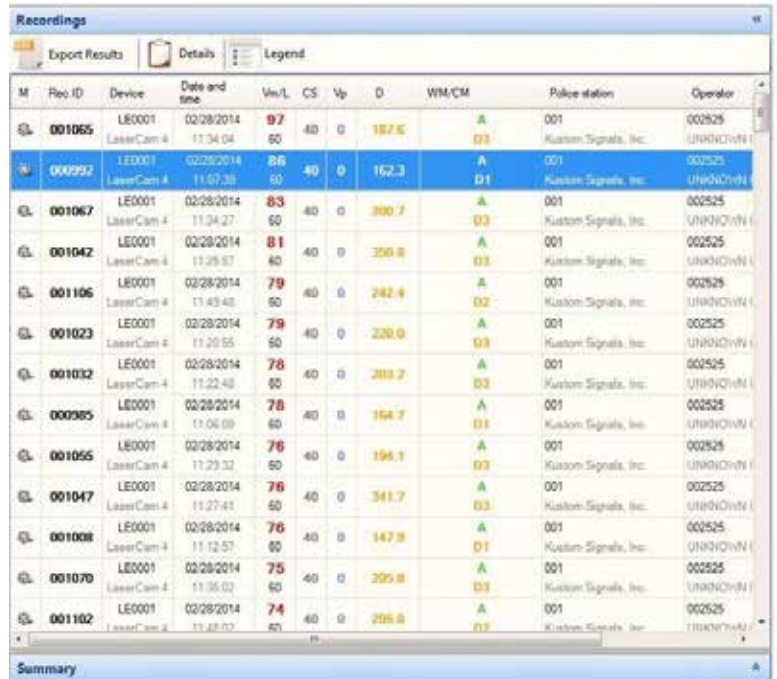

Provides all of the functionality of ProLog Lite plus:

- Export recorded data into multiple formats
- Track and plot multiple devices by GPS
- Support multiple devices and device types without having to login separately for each device
- Generate asset transfer history
- Administration and maintenance of ProLog database
- For use on networked server where the data resides

### ProLog Standard Client

Includes all of ProLog Standard function plus:

- Manage devices at multiple locations
- Provides data storage & access to data on ProLog Standard server

Event recordings

ProLog with zoom window

### Additional features on all ProLog versions

- Search and sort events by event number, device serial number, speed, date/time, station, operator
- Multiple language support
- Edit/crop images for detail or enter notes about the image as well as create maps and graph of tracking history
- All activity in Search Criteria may be exported including all: video images, map images, tracking history graphs and XML files with snapshots to enable case management
- Data from multiple stations (Client only) and devices can be collected and analyzed

### Target Speed and range graph of complete tracking history
